

Chapter 7

Ensemble Classifiers

August 9, 2017

Learning with ensembles

- Our goal is to combined multiple classifiers
- Mixture of experts, e.g. 10 experts
- Predictions more accurate and robust
- Provide an intuition why this might work
- Simplest approach: majority voting

Majority voting

- Majority voting refers to binary setting
- Can easily generalize to multi-class: plurality voting
- Select class label that receives the most votes (mode)

Combining predictions: options

- Train m classifiers C_1, \dots, C_m
- Build ensemble using different classification algorithms
- Use the same algorithm but fit different subsets of the training set

General approach
